LIGHTSABER DUEL

The lightsaber is an energy sword with a glowing plasma blade used by the Jedi and some of their enemies. Crafting a lightsaber is a special trial that every Padawan must complete. Using a penlight and some water, you too can see what it’s like to wield a lightsaber.

WHAT YOU NEED

- Jug and enough water to fill your container
- Milk
- Colored cellophane
- Penlight (one per lightsaber)
- Sticky tape
- Silver tape
- Clear container with flat sides

You will need to ask an adult for help or supervision with the steps that require scissors.

1. Firstly, personalize your penlight with silver tape. Every Jedi designs his or her own handle, so each one is unique. The ideal penlight for this experiment shines a narrow but strong beam.

2. These lightsabers get their color from cellophane rather than kyber crystals. Tape some on the sides of your tank. You could use two colors—blue for the light side and red for the dark side!

3. Position the tank on a flat surface with space to move about at each end. Once it’s in the right spot, fill the tank with water—you won’t want to shift it once it is full!

4. Next, add just a drop of milk to the water and stir gently until it disappears. Be sure to add just a tiny drop at a time—you can always add more milk later if you need to.

WHY NOT TRY?

The color of a lightsaber is determined by the kyber crystal inside it.

Jedi lightsabers are often green or blue, while Mace Windu wields a rare purple blade. Sith lightsabers are always red. Try different colored cellophane to see which color best suits you.

Shine a penlight through each sheet of cellophane. See how the beams differ from each other? Be careful not to hold the penlights too close to the cellophane as it can get hot and melt.

Now shine your penlight through the tank. You should be able to see the beam of your lightsaber in the water. If you can’t, add another drop of milk and try again.

Now it’s time to challenge a friend to a duel! For best results, conduct your battle in a darkened room. Why not film it, too? You could even try making lightsaber sound effects!

MILLENNI-YUMS

INGREDIENTS

- 1/4 cup (65 grams) peanut butter
- 1 large ripe banana, cut into ½-inch (12-millimetre) rounds, about 20 to 24 rounds
- 1 cup (80 grams) crushed vanilla wafers, approximately 22 cookies
- 2 cups (360 grams) chopped milk chocolate or dark chocolate
- 2 tablespoons coconut oil

1. Line a baking sheet with parchment paper or a silicone baking mat.
2. Spread 1 teaspoon of peanut butter onto the tops of half of the banana slices. Top with the remaining banana slices to create a sandwich. Place the filled bananas on the prepared sheet and freeze for 1 hour, or cover with plastic wrap and freeze overnight.
3. Place the crushed wafers in a shallow plate or bowl and set aside.
4. Place the chocolate and coconut oil in a glass or ceramic bowl. Microwave on high for 1 minute. Stir, and microwave again for 30 seconds. Continue heating and stirring until the chocolate mixture is smooth.
5. Dip a filled banana “sandwich” completely into the chocolate mixture. Lift it out with a fork and lightly tap the sandwich on the side of the bowl to remove any excess chocolate. Place the coated banana in the crushed cookies and use a spoon to cover completely. Place the coated banana back on the baking sheet. Repeat with the remaining bananas. Return the coated bananas to the freezer.
6. Freeze the sandwiches in an airtight container for up to 1 month.

Makes 10 to 12 treats.
